

DATE: November 27, 2013 (rev 12/2/13) FROM: WLAC PR Office | 310-287-4597

During the week of December 2, 2013 construction work will begin on the lower fire road and near the bus turnaround.

LOWER FIRE ROAD (highlighted in orange)

Work is being done on our lower Fire Road to complete our fiber optic loop and is not expected to disrupt normal vehicle or pedestrian traffic on campus.

BUS TURNAROUND (highlighted in green)

After testing the bus turnaround approved by Culver City, it was found that the circle needs to be expanded some for drivers to make a safer, more comfortable turn. Revision will begin December 6, 2013 and is targeted to be completed December 31, 2013. Safety guard rails and barriers which will regulate pedestrian and vehicle traffic will also be installed. While temporary construction fences and barriers will be in place for safety, pedestrians should still be able to use the normal routes to walk into campus from Lot 5 and to and from the north side of the college to the south side.
